Once the live date has passed, this training will be available on demand.

Overview

Whether you've been teaching for 20 years or you just started in the profession, there's always the possibility that you will have a student in your class whose behavior is disruptive. Disruptive classroom behavior not only interferes with teaching and learning, but it can also have a negative impact on classroom civility and the overall enjoyment of the learning experience.

The best classroom management strategy is to prevent disruptions before they occur. - Implement effective strategies for creating and sustaining an engaging and respectful learning environment
- Learn strategies for setting the right tone on the first day of class
- Generate a list of practical strategies for redirecting disruptive behaviors
- Learn how to handle side conversations, digital distractions, and inappropriate comments
- Review how to use positive language in a syllabus that sets expectations, policies, and procedures
